

# Value Delivered

Through Mazzella Companies' partnership, DataServ:

- Completed a comprehensive Information Systems and Technology assessment
- Continues to engage in ongoing strategic planning activities
- Holds quarterly meetings to discuss progress and prioritize next projects
- Transitioned MPLS wired network to a SD-WAN solution to increase the visibility of the performance of the network and prioritize traffic
- Designed and deployed the network to create a cohesive environment which has supported the company as it grows organically and through acquisitions
- Brings new sites online, nationally and internationally, in under two weeks
- Assists in the relocation of employees and connectivity quickly to increase flexibility for a mobile and changing business environment
- Delivers daily technology services as a utility in order to meet growing and changing needs

## Current Solutions and Services

- *Collaboration*
  - *Engineer, design, deploy, and continue to manage VoIP telephone system as a service for over 200 phones, and SIP trunking with redundancy as a service.*
- *Infrastructure*
  - *Engineer, design, deploy, and continue to manage server, storage systems as a service, LAN, WAN, SD-WAN, and Wireless/WiFi as a service.*
  - *Remediate issues with ERP system.*
- *Security*
  - *Engineer, design, deploy, and continue to manage backup, restoration management, and 24/7 monitoring as a service, and firewall system and security policies as a service.*

***“To facilitate Mazzella’s exponential growth, they needed a partner who understood how to align technology solutions and industry best practices with business objectives.” - Karl Seiler, President, DataServ***
